

# ArgenZ Anterior Zirconia

## What Customers Are Saying

---

“In 2015 at Gnathic Concepts Inc. Studio, a boutique lab in Newport Beach CA, our cases consisted of approximately 70 to 80% Emax® restorations. Since we began testing and working with Argen’s Anterior Zirconia most of our current cases 80 to 90% cases including implant restorations are now Argen’s Anterior Zirconia.”

– **Frank Escalante, CDT AACD, Gnathic Concepts Inc. Studio**

“We have transitioned all of our single unit restorations to ArgenZ Anterior. It has fantastic esthetics. In my opinion, it is the most lifelike zirconia we’ve used.”

– **Leon Hermanides, CDT, Protea Dental Studio**

“With the obvious improvements of ArgenZ Anterior over the Bruxzir Anterior Material we see an opportunity for improving our product line here at Killian.”

– **Steven Killian, CDT, President, Killian Dental Ceramics**

“ArgenZ Anterior is superior to other super translucent zirconia and lithium disilicate. We used BruxZir but it only comes in the 3 shades and is hard to stain if the shade is too dark. We also use emax, however it takes too long to stain. The ArgenZ Anterior is better because it comes in many shades and is easy to stain. We will move all our Doctors to the ArgenZ Anterior.”

– **Tony Kantarci, Dentech Ceramic Restorative**

“I am EXTREMELY happy with the new ArgenZ Anterior material. One of my accounts is a serious emax® user and I recently did 2 adjacent crowns with the Anterior. The dentist commented that she had to look closely to see if they were emax® or zirconia units. I have started using the material on most of my full contour posterior crowns. Thanks again to Argen for the great material”

– **Dave Matrisciano, Legacy Dental Ceramics, Inc.**

“The most esthetic crown that I’ve seen in 2 years. Job well done to all of you.”

– **Michael Mortellite, MBM Dental Lab**

## What Customers Are Saying

---

“ArgenZ Anterior is a really nice material, solid fit and very beautiful. I feel it is the number one on the market.”

– **Felix Visnodul, Power Tech**

“We have been using ArgenZ Anterior since it was introduced and are getting superior results. It is our go to restoration”

– **Scott Bowman, WS Dental Studio**

“The new ArgenZ Anterior Super Translucent Zirconia has become a great addition to our product line. It has quickly become our “go to” product of choice in aesthetic restorative options. ArgenZ Anterior is extremely natural looking and easy to stain and glaze!”

– **Frank Spataro, Innovative Labs**
