ArgenIS custom abutments are manufactured with one thing in mind: **the patient.**

Argen's advanced engineering and state-of-the art manufacturing produces precise, industry leading tolerances between the implant and abutment to ensure excellent fit every time. Argen's custom abutments are compatible with the leading implant systems for maximum efficiency and function. We provide extensive warranty offerings for increased customer satisfaction and your complete peace of mind.

Argen's digital technology services help your lab elevate its capabilities by delivering a digital workflow that is unrivaled in the industry. We can implement a completely custom workflow based on your needs, from scan to model, design of the abutment, to the coping and crown. Experience best-in-class speed with our fast, two-day turnaround time.

At Argen, we understand that dental laboratories are building a smile, not just abutments, one patient at a time.

Argen's Implant Specific Abutments

Argen's custom abutments and screws are certified OEM-equivalent; they function comparably to OEM (Original Equipment Manufacturer) parts. Our manufacturing processes and standards are designed to create the highest quality implant solutions compatible with the leading implant systems.

Laboratories, doctors, and patients can have complete peace of mind knowing the performance of Argen's implant parts is assured and covered by an extensive warranty.

Why dental laboratories choose Argen's Implant Specific Abutments

	Argen Implant Specific Abutments	Various OEM Abutments
FDA 510(k) Cleared	✓	✓
MDSAP Certified	✓	Varies
ISO 13485	✓	Varies
Warranty (Implant & Abutment)	✓	Varies
Strict Tolerances	✓	✓
True-to-Design Margins	✓	✓
Split Files	✓	Varies
FDA 510(k) Cleared 2 Final Screws	✓	Varies
Better Value	✓	---

**Extensive Warranty**

Custom Abutment and Bar Warranty

Argen provides a limited warranty for all Argen manufactured custom abutments and specified bars. In addition, if an implant supplier does not honor their warranty due to the use of an Argen abutment or bar, Argen will replace both the abutment and the implant – certain limitations apply. Please visit argen.com for complete terms and conditions of the warranty.

Visit argen.com for complete terms of the warranty.

**FDA 510(k) Cleared /
ISO 13485
MDSAP**

FDA 510(k) Cleared, ISO 13485 Certified, MDSAP Certified

While most OEM manufacturers have 510(k) clearance, Argen has gone a step further to become MDSAP compliant. MDSAP is a global approach to auditing and monitoring the safe manufacturing of medical devices. It is not a one-time pass or fail; Argen is routinely monitored to ensure we meet these standards. This compliance provides our customers with peace of mind knowing Argen consistently offers quality products.

**Robotic Automation**

Robotic Automation

Argen's custom-built 5-axis FANUC Robodrills, 6-axis FANUC robots, and software work together to streamline our abutment milling process. The integrated solution automates our abutment manufacturing, ensuring consistency and quality throughout the process.

**Advanced
Milling Strategies**

Advanced Milling Strategy

- Advanced milling strategies for true-to-design margins and finishes
- Automated nesting and strategy selection for optimal efficiency
- Rapid toolpath calculation and machine motion optimization for increased speed to completion
- Post-machining probing for accurate inspection

**End-to-End
Manufacturing**

Vertical Integration

Argen's engineered end-to-end system provides complete oversight of the production of blanks, milled custom abutments, and final screws. We even manufacture the tooling used in the milling process. This level of control allows us to produce the most precise and consistent OEM-equivalent parts.

Argen – A Partner You Can Trust

Argen is committed to doing whatever it takes to make dental labs successful. Our extensive abutment warranty includes the abutment and implant.

“

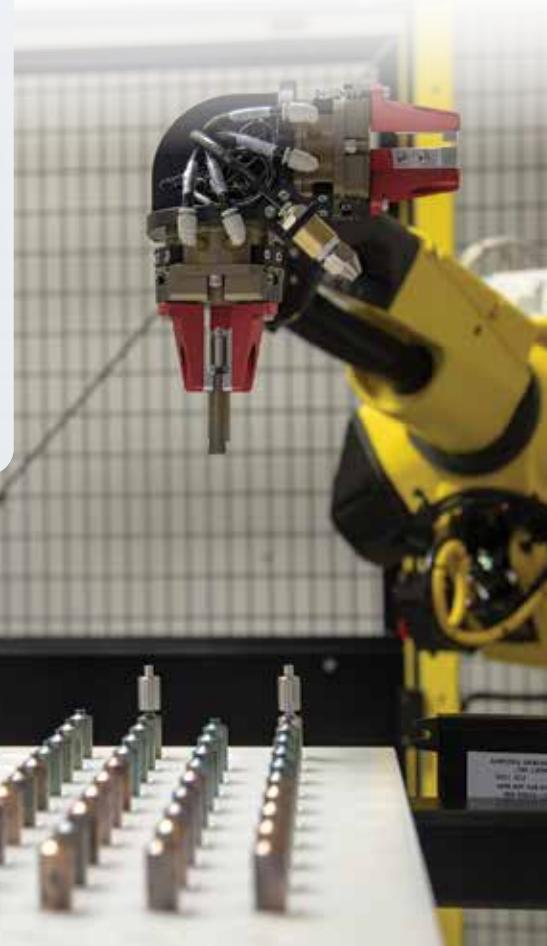

Before using Argen custom abutments, we struggled to design abutments to our exact specifications due to manufacturing limitations. Argen solved this by allowing us to create precise designs with minimal hand customization.

We value their ease of uploads, exceptional customer service, accurate design-to-abutment match, high-quality finish, and the inclusion of two screws. Their fast turnaround, consistent quality, and variety of implant systems make them a trusted partner.

I would recommend Argen for their unmatched quality, consistency, and value — they've transformed our workflow and results.

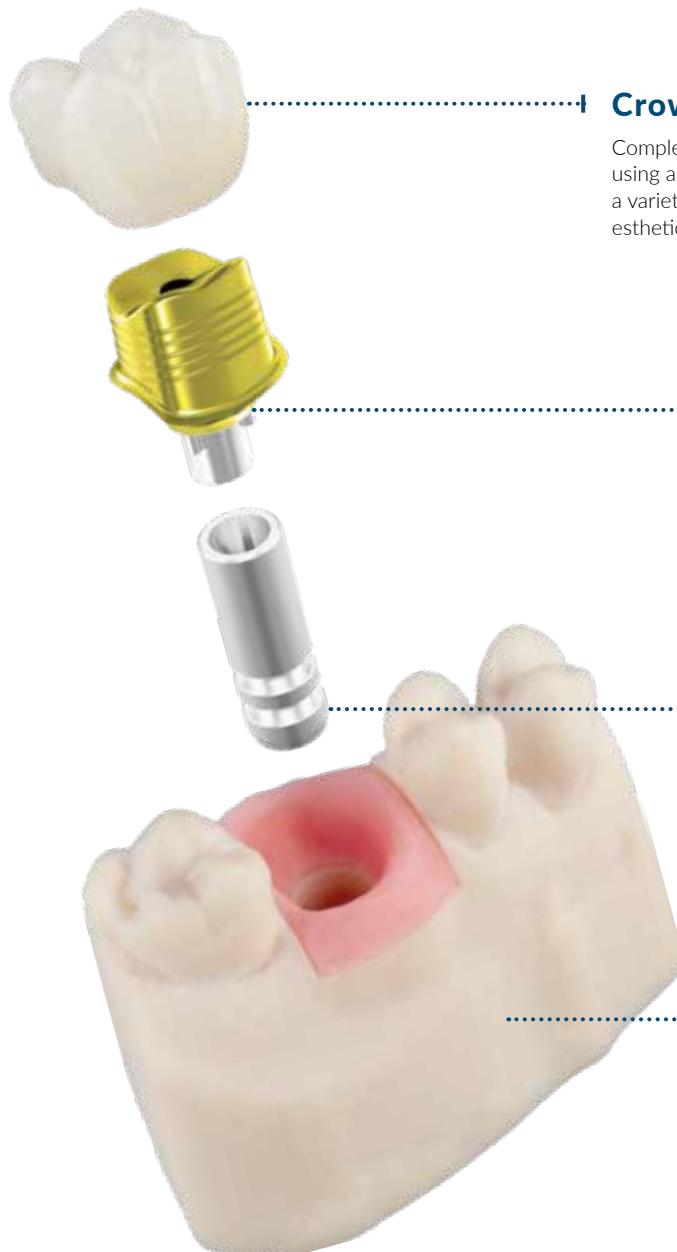

”

Brad T Alioto
CAD/CAM Manager, Owner
Expertec Dental Laboratory, Inc.

Designed Together. Manufactured Together. Shipped Together.

Crown

Complete your case efficiently in one digital workflow using an ArgenZ™ zirconia crown. Argen manufactures a variety of top-quality zirconia options to meet the esthetic demands of each case.

Abutment

Advanced engineering, state-of-the-art manufacturing and our FDA-cleared proprietary manufacturing processes ensure precise, industry-leading tolerances for an optimal fit every time.

DIM Analog

The ArgenIS Digital Implant Model (DIM) analog is used in combination with printed models in digital workflows. Consisting of two pieces, this implant analog ensures accurate alignment of its mating parts and is reusable between models of the same system and size.

Digital Model

Argen is an industry leader in digital implant models using state-of-the-art technology in 3D printing.

ArgenIS

Product Offering

Argen gives you the flexibility to scan and design your own abutment and submit your design file to argen.com for precision milling by our professional CAD/CAM engineers. Our custom abutments are milled with a 5-axis precision mill for the highest quality units, with no finishing or polishing required.

Titanium Custom Abutment

2 final screws included

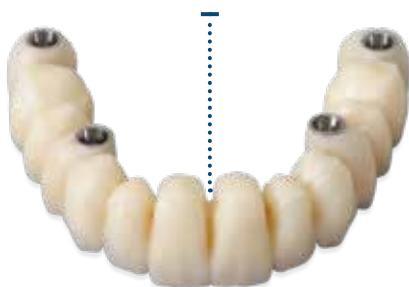

Multi-Unit Abutment Ti Base

1 final screw included

Screw-Retained Bridge

Available with or without gingiva

Gold Shaded Custom Abutment

2 final screws included

Angled Screw Channel Hybrid Abutment

Available with top only

Screw-Retained Full Contour Hybrid Custom Abutment

Gold shaded base optional

Custom Abutment Type

ISO 13485 and MDSAP

Quality in everything is an Argen core value. ISO 13485 is a quality standard used universally around the world. Argen earned this certification by implementing a stringent quality management system that governs our end-to-end manufacturing process. MDSAP is Medical Device Single Audit Program and is the result of several countries coming together to develop a single regulatory audit that would meet all the requirements of the countries. Ensuring quality in everything, Argen is ISO 13485 certified and MDSAP compliant.

Why ArgenIS?

Trust

- Extensive abutment warranty – includes abutment and implant
- Easy return policy
- Committed to doing whatever it takes to make dental labs successful

Product

- Model, abutment, and crown production in one workflow
- Options for multi-unit abutments, hybrids, retention lines, and gold hue
- Narrow scan bodies allowing for more flexible use

Manufacturing

- State-of-the-art manufacturing in the USA
- Industry-leading tolerances between the implant and abutment
- FDA-cleared proprietary process and strict adherence to quality control standards

Fast One-Stop Shop

- One day to make, one day to ship
- Fast file upload and split file management

Custom Abutment and Bar Warranty

Argen provides a limited warranty for all Argen manufactured custom abutments and specified bars. In addition, if an implant supplier does not honor their warranty due to the use of an Argen abutment or bar, Argen will replace both the abutment and the implant – certain limitations apply. Please visit argen.com for complete terms and conditions of the warranty.

Visit argen.com for complete terms of the warranty.
