

# Argen Digital Models

## **Model C**<sup>TM</sup>

Streamline your operations using Digital Models as an individual order or as part of the complete process from scan to restoration.

### Why labs choose Model C:

- Crisp margins and accurate anatomical features
- Smooth surface texture
- Perfect for solid models, removable dies, and implant cases
- Uses the most advanced manufacturing technology available
- Tight and precise DIM analog fit
- Can be used for processing porcelain veneer crowns
- Ability to wax to the model
- Ability to trim margins

Now Available with  
**Soft Tissue**

**Available in single dies through full arch models.**
