

Digital Models

Information Guide

PRODUCT OVERVIEW

Digital Models - physical model built in the digital workflow, available in single unit through full arch. Labs are able to streamline their operations whether they use digital models as an individual order or as part of the complete process from scan to restoration.

CUT-OFF TIME

Files must be submitted by **3:00 p.m. PST (6:00 p.m. EST)**
Digital Models will be received within 2 business days.

DESIGN & UPLOAD PROCESS

Creating models can be accomplished with any intra-oral scanner that is compatible with a lab's benchtop scanner, utilizing the appropriate model designing software. When submitting your files, please make sure they are either STL or DCM files and the articulator interface is designed into the file if applicable. When the models are received, they will fit into the articulator. We do not charge extra for pull-out dies, so include these STL files as part of your case.

Please contact Argen Digital for recommended design parameters.
