

Argen Bite Splints

The productivity
solution every lab needs.

Milled Bite Splints

Traditional Hard Splint

- Milled from Argen's ultra-clear PMMA
- Traditional hard splints that offer the benefits of CAD/CAM milling
- Tough and durable, and comfortable to wear
- No post processing required

Printed Bite Splints

Flexible Hard Splint

- Printed using a FDA-cleared resin that is less prone to discoloration and staining
- Not brittle compared to traditionally thermal cast bite splints
- More comfortable to wear due to its unique flexural property where the splint becomes more pliable at body temperature
- Available as polished or unpolished

Ideal for treating bruxism grinders and clenchers, to protect new dental work,
and as bite deprogrammers. Quick 2 day turnaround.
