

Roland DGA Dental Mills

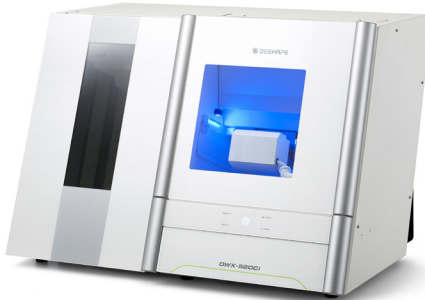

Built for Precision

DWX-53DC

Powerful and efficient, the Roland DWX-53DC Dry Mill is the ultimate in ease, material flexibility and unattended production.

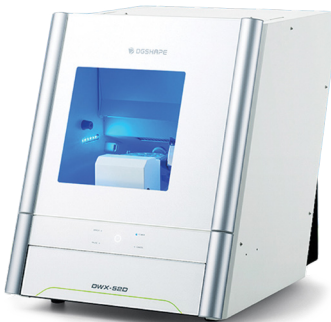

- 6-slot automatic disc changer, 15-station automatic tool changer, and other automatic features
- Internal web camera for monitoring remote progress
- 5 axis dry dental mill

DWX-52DCi Dry Mill

Ultimate in ease, material flexibility and unattended production. Same great features as the DWX-52D, plus:

- 6-slot Automatic Disc Changer (ADC) to increase productivity overnight and during weekends
- 15-station Automatic Tool Changer (ATC) and Intelligent Tool Changer (ITC) for uninterrupted milling
- Performance visualization software and other intelligent updates

DWX-52D Dry Mill

Reliable, precise, and affordable.

- Precision 5-axis milling of zirconia, wax, PMMA, composite resin, glass fiber reinforced resin, composite resin, CoCr sinter metal and more
- 15-station Automatic Tool Changer (ATC) and Intelligent Tool Changer (ITC) for uninterrupted milling
- Better disc handling, improved tool management and other enhanced features

DWX-42W Wet Mill

Easy-to-operate, high-performance.

- High-speed, precision milling of high-esthetic glass ceramics and composite resin
- Expanded 6-tool Automatic Tool Changer for uninterrupted milling
- Open architecture allows seamless integration with existing scanning devices
