LEARN WHILE YOU EARN AT SKILLBOND'S
INTERNATIONAL EDUCATION CENTRE

DENTAL INNOVATORS TO THE WORLD

Updates on social media

WELCOME TO SKILLBOND'S INTERNATIONAL EDUCATION CENTRE

ABOUT THE EDUCATION CENTRE

With a state-of-the-art, customised and purpose-built laboratory, a bright refreshing seminar room for presentations and lectures, including a relaxing break-out dining area, Skillbond offer you an environment which will enrich your experience whilst you earn valuable verifiable CPD hours!

We offer a varied yet comprehensive programme of courses for Prosthetics, Crown & Bridge and the Digital environment, inviting world-renowned

presenters and demonstrators from suppliers of the leading product brands, as well as our own accredited training staff.

As an International Centre offering "Excellence Through Training", Skillbond welcomes all technicians from the UK, Europe and extending worldwide, to attend its popular certified courses ranging from 1-day introductory to 2-day advanced courses.

***NB. THIS BROCHURE IS FOR PREVIEW PURPOSES AND DOES NOT INCLUDE ALL COURSES, PLEASE EMAIL courses@skillbond.com OR CALL 01494 448474 FOR FURTHER ENQUIRIES.**

ACCREDITED 3SHAPE AND EXOCAD TRAINERS

OUR DIGITAL TEAM ARE ACCREDITED 3SHAPE AND EXOCAD TRAINERS.

We offer install training with purchase/rental of all 3Shape scanners to set you off on the right foot for your journey into the scanned, designed and printed workflow. We also offer different Levels of 3Shape training as well as bespoke training for your lab's specific requirements.

We offer similar training to the above for GC Aadva scanners with exocad Ultimate software covering many modules such as Bar, Model Creator, Splint, RPD, Denture, Smile Creator etc.

3shape  accredited trainers 

BESPOKE TRAINING IN-HOUSE AT YOUR LAB

Skillbond can offer you a day (or more) of bespoke training at your lab, either one-to-one or for your entire team. As well as eliminating travel, you can learn how to use your own equipment in your lab's natural environment and set up!

3SHAPE SOFTWARE AND SCANNER COURSES

3SHAPE BASIC CROWN & BRIDGE DESIGN

The main objective of this basic course is to guide the delegate through the first steps of scanning and designing in 3Shape software. The delegate will spend the day using the software to design a range of basic crown and bridge products to a competent level.

COURSE DETAILS:

Registration is at 8.45am, the course will commence promptly at 9.00am and finish at 5.00pm. Price **£250.00** + VAT

- 7 Verifiable CPD hours
- Visual learning
- Hands-on learning
- Computer literacy is an essential requirement
- Lunch provided

3SHAPE REMOVABLES COURSES

1. ADVANCED RPD DESIGN
2. ADVANCED DENTURE DESIGN

The main objective of these advanced courses will be to guide the delegate through the intermediate steps of scanning and designing in 3Shape software. The delegate will spend the day using the software to design a range of intermediate products to a competent level. (Must have completed basic course or be confident in designing the above).

Must have completed Basic Level Courses

COURSE DETAILS:

Registration is at 8.45am, the course will commence promptly at 9.00am and finish at 5.00pm. Price per course **£295.00** + VAT

- 7 Verifiable CPD hours
- Visual learning
- Hands-on learning
- Computer literacy is an essential requirement
- Lunch provided

3SHAPE ADVANCED ABUTMENT & BAR DESIGN

The delegate will have the opportunity to design Implant abutments & basic bars, gain the technical knowledge and expertise offered by this course. From a practical hands on experience and theoretical demonstration offered by a 3Shape expert. This will allow the delegate to apply the processes within their own laboratory.

Must have completed Basic Level Courses

COURSE DETAILS:

Registration is at 8.45am, the course will commence promptly at 9.00am and finish at 5.00pm. Price **£395.00** + VAT

- 7 Verifiable CPD hours
- Visual learning
- Hands-on learning
- Computer literacy is an essential requirement
- Lunch provided

3SHAPE SMILE DESIGN COURSE

During this one day course, you will receive hands-on software training covering Smile Design and Real View application based on Dental System software. Not only will this course improve the methodology you use when designing restorations but it will also open a new service opportunity within your laboratory.

Must have minimum 6 months design experience and be competent with the Advanced Level Courses.

COURSE DETAILS:

Registration is at 8.45am, the course will commence promptly at 9.00am and finish at 5.00pm. Price **£395.00** + VAT

- 7 Verifiable CPD hours
- Visual learning
- Hands-on learning
- Computer literacy is an essential requirement
- Lunch provided

EXOCAD SOFTWARE AND SCANNER COURSES

EXOCAD BASIC CROWN & BRIDGE DESIGN

The main objective of this Level 1 course is to guide the delegate through the first steps of designing in exocad software. The delegate will spend the day using the software to design a range of basic crown and bridge products to a competent level.

COURSE DETAILS:

Registration is at 8.45am, the course will commence promptly at 9.00am and finish at 5.00pm. Price **£250.00** + VAT

- 7 Verifiable CPD hours
- Visual learning
- Computer literacy is an essential requirement
- Hands-on learning
- Lunch provided

EXOCAD REMOVABLES COURSES

1. ADVANCED RPD DESIGN

2. ADVANCED DENTURE DESIGN

The main objective of these advanced courses will be to guide the delegate through the intermediate steps of scanning and designing in exocad software. The delegate will spend the day using the software to design a range of intermediate products to a competent level. (Must have completed basic course or be confident in designing the above).

Must have completed Basic Level Courses

ARGENZ: FULL CONTOUR DESIGN, STAIN AND GLAZE

ARGENZ

DESCRIPTION

The delegate will spend the morning understanding the ranges of ArgenZ zirconia. Using 3Shape software they will design 2 full contour crowns to a competent level and learn how to 'mirror' teeth. The afternoon will then be spent staining, glazing and finishing the crowns using the latest paste and stain materials and gaining an understanding of how to process sintered zirconia.

CONTENT

- Full Contour design including 'mirroring' using 3Shape software
- Sintered zirconia preparation
- Tips and tricks for trimming and finishing sintered zirconia
- Stain, glaze and polishing full contour crowns

COURSE DETAILS:

Registration is at 8.45am, the course will commence promptly at 9.00am and finish at 5.00pm. Price **£495.00** + VAT

PRINTED DENTURES: LUCITONE DIGITAL PRINT SYSTEM

Dentsply
Sirona

DESCRIPTION

The main objective of this course is to guide the delegate through the process of designing, nesting, printing and finishing a full denture and teeth using the Lucitone Digital Print workflow and their materials utilizing the validated Asiga Printers. The morning will be spent in overview of the relevant materials and design parameters required to produce the best digital denture available. The afternoon will then be spent printing and finishing.

CONTENT

- Lucitone Print Materials Overview
- Design Full Denture and Teeth
- Live Demo
- Copy Denture and Partial Denture
- HC Libraries
- Polish and Finish Dentures

Presented by Davide Accetto, founder & Director of Nifty Dental Solutions Laboratory, a new cutting-edge generation of dental laboratories based in Oxfordshire, focused on 3D printing and CAD design.

PRINTED DENTURES: CUSTOMISATION WITH SR NEXCO AND AKZENT LC

DESCRIPTION

Presented by key opinion leader Lola Welch who champions aesthetic and technical excellence.

Digital dentures, printed or milled - this course demonstrates how to characterise a denture, using Ivoclar SR Nexco composite, and make it look fantastic!

- Gain an insight into the benefits and possibilities of digital dentures
- Learn the correct protocol for denture preparation prior to composite application
- Understand the best way to handle LC composite for best results
- Gain an understanding of gingival anatomy
- Learn the correct finishing techniques for gum composite

Delegates will gain an understanding of how to customise a printed denture using LC composite.

Producing an aesthetic and natural appearance using simple techniques that can be used on a daily basis in the laboratory.

AESTHETIC WHITE & PINK A DISTINCTIVE APPROACH USING KATANA ZIRCONIA

DESCRIPTION

Presented by renowned International Kuraray Noritake Instructor Daniele Rondoni.

A 2-day course to learn the correct protocol for handling multiple unit zirconia with gingiva. Providing a predictable aesthetic outcome, using Kuraray Noritake Katana HTML and YML zirconia, CZR porcelains and FC Paste Stains.

For a perfect final result of both shade and texture, it is paramount to have a logical system in place. A criteria for zirconia selection, a specific manual finishing technique, pre and post sintering and a precise and well determined sintering process, provides the best aesthetic and mechanical potential of your zirconia.

Finishing with a repeatable technique of Micro-Layering, giving predictable aesthetic results every time.

DANIELE RONDONI
