

# ARGEN Z ANTERIOR

Super Translucent Zirconia

## The Most Talked About Anterior Zirconia on the Market!

- Better Esthetics
- More Consistent
- Easier to Use
- Faster Sintering
- Great Pricing

Available in discs and through Argen Digital.

"In 2015 at Gnathic Concepts Inc. Studio, our cases consisted of approximately 70 – 80% e.max®\* restorations. Now 80 – 90% of our cases, including implant restorations, are Argen's Anterior Zirconia."

– Frank Escalante  
CDT AACD, Gnathic Concepts Inc. Studio

"We have transitioned all of our single unit restorations to ArgenZ Anterior. It has fantastic esthetics. In my opinion, it is the most lifelike zirconia we've used."

– Leon Hermanides  
CDT, Protea Dental Studio

"ArgenZ Anterior is superior to other super translucent zirconia and lithium disilicate. It comes in all shades and is easy to stain. We will move all our Doctors to ArgenZ Anterior."

– Tony Kantarci  
Dentech Ceramic Restorative
